

August 27, 2018

Welcome back! I look forward to a great year.

Chez Chem AP Chemistry 1-1-1

Objective: No School today

ASSIGNMENT:

Please print out the warm ups for 1-1 (Quarter 1 Week 1) to begin this study. Tuesday a quiz grade will be assessed for the warm up assignments being prepared and ready to go. Maybe even look at them and see if you can answer any, or some. Preparation is key in this class, and if you can get ahead it is even better☺ Establish good habits. This course depends on you spending time in understanding the concepts being given. Your learning will be assessed by the National College Board. A Safety Quiz will be given on Tuesday, 1-1-2 and a score of 100% is required to participate in the Chemical Reactions lab on Wed.-Fri.

Lab notebooks are available for \$15.00. Pay in the front office first, then bring me the receipt and I will give you a lab notebook. You will need to have the first lab prepared for Wednesday. First lab check. Sometimes schools want to see your lab book to determine if they will give you the credit. Try to keep the table of contents updated. Wed-Fri we will have a 3 day lab, "Chemical Reactions." All write ups will have the same basic format. Note lab notebook page in packet.

It seems like a long way away, but everything we do in this class is aimed at your earning a top score on the exam. Keep up and it will be no problem, also I highly recommend the *Cracking the AP Chemistry Exam*, 2018 Edition. You can order it online at amazon.com for fourteen dollars. Please get the print version. If you would like, try the kindle, but for sitting and learning it is better to have the print . . . at least for me. It would be extremely helpful for you to purchase the print version **asap**. The link is:

https://www.amazon.com/Cracking-Chemistry-Exam-2019-Preparation-ebook/dp/B079R2B4MJ/ref=sr_1_3?ie=UTF8&qid=1531687820&sr=8-3&keywords=princeton+review+ap+chemistry+2019

The chapter problems in the book in Mastering Chemistry are due at regular intervals, you need to continue working on these problems as we go. Chapters 1 and 2 should be mostly review. The Introduction will be given extra credit. The problems are quiz grades for each chapter. **I am always available to help, please see me and please ask questions as we go.**
